

## Challenge #7: Block, Inline, Class, and Id

I use div as my block then inside it there's h1 and h3, then I use "hpage-text" as my class. I also have Id but it's in another line.

```
<div class="hpage-text">  
  <div class="hpage-text-a">  
    <h1>Welcome to MyGames</h1>  
    <h3>Let's explore the world</h3>  
  </div>/.hpage-text-a  
</div>/.hpage-text
```

```
id="nav-icons">
```
