

## Challenge #9: Video and Forms

For the embed video I use a video from YouTube and link it to my site.

```
<div class="iframe-con">  
  <div class="iframe-con-a">  
    <iframe width="560" height="315" src="https://www.youtube.com/embed/560" allow="accelerometer; autoplay; clipboard-write; encrypted-media; gyroscope; picture-in-picture; web-share" referrerpolicy="strict-origin-when-cross-origin" frameborder="1">  
  </div>/.iframe-con-a  
</div>/.iframe-con
```

For the video in my local file I use the video and insert on it.

```
<div class="game-vid">  
  <video autoplay loop muted src="video.mp4">  
</div>/.game-vid
```

My Contact form with its design, just a simple form.

The image shows a contact form titled "Get In Touch" in a bold, black, serif font. The form is contained within a white rounded rectangle with a thin black border, set against a background with a purple-to-blue gradient. The form consists of three input fields: a "Name" field with a person icon, an "Email" field with an envelope icon, and a larger "Message" field. Below these fields is a purple "Send" button. The form is styled with a clean, modern aesthetic.
