Challenge #1: Goal

My Goal is to make things easier for gamers to find good quality games. All they needed to do is to scroll and find games and also the links will be provided, then they will get redirect to where they can download and get the game easily. And with the help of this site, they will not have to spend time looking for the game.

My Plan is to create a game site information for gamers that wants to find good games in an easiest way as possible. This website will provide them the information they needed for the game. As a game enthusiast I really love playing games so much, enjoying every hour playing my favorite games. Then there's that one-time u saw a game on the internet and you find it interesting to but you don't know where to get it, although there are some platforms that will provide you information about it and where to get but that's a lot of work for just a single game. All those hassles will be eliminated when you use this site, all you have to do is scroll and choose the game you want then download. As for the link it is also provided along with the app info.
